CORE COMPETENCIES

- Enterprise Automation
- API-First Design
- Complex Data Mapping
- Custom CRM Architectures
- n8n Self-Hosting & Ops
- LLM Orchestration
- Technical Debt Mitigation
- Security & Compliance
- Process Mining
- Change Management

TECH STACK

- ▶ n8n · Make · Zapier
- ▶ REST API · Webhooks · JSON
- ▶ SQL · PostgreSQL · Supabase
- ▶ Python · JavaScript (Node.js)
- ▶ Prompt Engineering (LLMs)
- ▶ Docker · GitHub · CLI

PROFESSIONAL SUMMARY

Senior-level automation specialist with extensive experience designing and deploying **production-grade agentic workflows in highly regulated sectors**. Expert at building unified intelligence layers that consolidate disparate technical stacks (11+ platforms) into cohesive, API-driven environments. Proven ability to bridge the gap between complex technical architectures and high-stakes operational outcomes, delivering massive measurable savings (\$160k+/mo) through structural process improvement.

KEY ACHIEVEMENTS

- ✓ Architected CCM Platform: A unified agentic layer that integrated 11+ systems via REST APIs and Webhooks
- ✓ Eliminated 100% of compliance failures in high-volume Medicare calls via real-time automated monitoring
- ✓ Developed custom build automation for EV documentation, authoring technical schematics through AI-assisted pipelines
- ✓ Reduced technical debt and training ramp by 80% through workflow consolidation and unified UI design

TECHNICAL EXPERIENCE

**Founder & Automation Architect** 2024 – Present  
Jaws AI 911 / SNG Cycles

- ◆ Architects **resilient automation pipelines** that handle high-volume lead capture, data validation, and real-time CRM updates.
- ◆ Builds **agentic tools** using custom scripts and no-code orchestration to solve non-linear engineering and operational challenges.
- ◆ Designs and manages Supabase/PostgreSQL database environments for tracking complex parts lists and customer data.

**Director of Systems & Operations** 2022 – 2025  
TailorMade Insurance Group

- ◆ Led the transition of a legacy healthcare operations group to an **API-first workflow environment**, overseeing the full technical build cycle.
- ◆ Developed and maintained documentation for all technical automations, ensuring security standards and regulatory compliance were met.
