Caul Group

Director of Revenue Systems & AI Automation (Offshore)

Dear Caul Group Team,

Revenue isn't just a sales outcome; it's a systems outcome. Over the last several years, I've focused on building the intelligent systems that drive revenue by eliminating the friction that kills conversion. I don't just manage revenue operations; I automate the workflows that make revenue growth inevitable.

My background is unique because it combines high-volume sales leadership with hands-on AI system development. I spent years in the Medicare insurance sector—one of the most regulated and competitive environments in existence—where I managed contact center teams and designed the operational frameworks that drove thousands of compliant enrollments.

When I realized the "human-only" workflow had reached its limit, I built the ****Complete Care Marketing (CCM) platform****. It's an Enrollment Intelligence System that replaces fragmented tool stacks with a single unified intelligence layer. By using AI to monitor live calls, surface real-time guidance, and automate compliance auditing, I ramped new hires in 3-5 days instead of 4 weeks. For a 300-agent team, the training savings alone were \$160k/month, while conversion rates climbed because agents could finally focus on the customer instead of their tools.

I'm applying to Caul Group because you need a Director who can bridge the gap between revenue strategy and technical AI execution. You need someone who can lead an offshore or remote team to build systems that capture every inbound opportunity and maximize the lifetime value of every lead. I've already built and verified these systems in the real world, and I know how to scale them.

I own the revenue system. Whether it's optimizing a CRM, building custom AI automation for lead scoring, or designing real-time agent guidance systems, I focus on the metrics that matter: conversion, retention, and cost-to-acquire. I operate with a founder's mindset—if a system doesn't perform, I find the root cause and fix it.

Caul Group is looking for a leader to own its revenue automation future. I have the experience, the technical portfolio, and the operational background to deliver that future at scale.

I would welcome the opportunity to discuss how my AI-powered revenue systems can drive growth for Caul Group.

Sincerely,

Bryan Jaworski
