- ▶ Contact Center Operations
- ▶ AI Adoption at Scale
- ▶ Remote-First Teams

CONSULTING APPROACH

- ▶ Discovery & Current-State Assessment
- ▶ People Impact Mapping
- ▶ Adoption Roadmap Design
- ▶ Full Delivery & Implementation
- ▶ Post-Go-Live Sustainment

PROFESSIONAL SUMMARY

Change management practitioner who has designed and delivered a full AI transformation for a 300-person organization in a high-stakes regulated environment — from discovery through go-live and sustained adoption. Combines hands-on technical build capability with the human-side work that makes transformations actually stick: stakeholder alignment, resistance management, communication strategy, training design, and coaching. Active consultant through Jaws AI 911, architecting and deploying AI-powered workflow systems for clients. **Not an advisor who recommends and moves on — an operator who owns outcomes end to end.**

CORE EXPERIENCE

AI Transformation Architect & Change Lead

2023 – Present

Complete Care Marketing Inc. · Medicare Contact Center (300 Agents) · Remote

- ◆ Designed, built, and led the full adoption of the **CCM Enrollment Intelligence System** — replacing 11 fragmented platforms with a single unified AI layer serving 300 agents. Owned every phase: discovery, architecture, change strategy, communication, training, launch, and post-go-live sustainment.
- ◆ Conducted current-state assessment across all agent workflows, mapped people impacts by role and function, and built a stakeholder engagement plan that addressed both leadership sponsors and frontline resistance simultaneously.
- ◆ Designed and delivered a **complete training and onboarding program** around the new system — reducing new-hire ramp from 4 weeks to 3-5 days (**80% reduction**) while improving early-tenure compliance scores.
- ◆ Built a **real-time compliance engine and live call coaching module** — eliminating high-risk call behaviors not through policy reminders but through structural workflow redesign that made non-compliant actions architecturally impossible.
- ◆ **\$160,000/month in operational savings** delivered through training efficiency, reduced tool overhead, and agent productivity gains — outcomes tracked and reported to leadership throughout the program.
- ◆ Managed organizational resistance through direct coaching, peer champion networks, and iterative feedback loops — achieving full adoption across a 300-person team with no rollback or parallel-running period.

AI Workflow Consultant & Founder

2024 – Present

Jaws AI 911 · AI Automation Consulting · jawsai911.com

- ◆ Active consulting practice architecting and deploying AI-powered workflow automation for business clients — n8n, Make, Zapier, REST APIs, Supabase/PostgreSQL, LLM orchestration using Claude and OpenAI.
- ◆ Works directly with founders and operators to assess current-state processes, identify automation leverage points, and deliver systems that **change how teams work** — including the adoption work to make those changes hold.
- ◆ Translates complex technical systems into plain-language change narratives for non-technical stakeholders — ensuring sponsors understand what's changing, why, and what success looks like.

Call Center Sales Manager

2022 – 2025

TailorMade Insurance Group · Medicare Contact Center

- ◆ Led a contact center team through multiple operational transformations — new technology rollouts, process redesigns, and compliance program overhauls — managing both the technical change and the people side of adoption.
- ◆ Built QA frameworks, coaching programs, and performance management systems from scratch. Designed training curricula and onboarding tracks that improved new-hire retention and ramp speed.
- ◆ **Managed change fatigue** in a high-turnover industry by building psychological safety, transparency, and a culture of continuous improvement rather than top-down mandates.

CHANGE MANAGEMENT OUTCOMES

✓ Full AI adoption across 300 agents — no rollback, no parallel systems, sustained post-go-live

✓ 80% reduction in training ramp time — 4 weeks to 3-5 days — through redesigned onboarding and system UX

✓ \$160k/month in savings delivered and tracked — presented to executive leadership as transformation ROI

✓ Zero compliance failures post-launch — achieved through workflow redesign, not training reminders alone

✓ 11 platforms retired and replaced — change managed across every affected role with no process regression

✓ Active consulting practice validating change methodology across multiple client engagements simultaneously
